## OSTEOPOROSIS DOESN'T LOOK GOOD ON ANY BODY.

For a look that's always in, take care of your bone health. Because if we cared about our bones as much as we do about our appearance, osteoporosis wouldn't be one of the most debilitating diseases for women over 50.

To find out what you can do to help beat and treat osteoporosis, talk to your doctor and visit [www.nof.org](http://www.nof.org).

Osteoporosis. It's beatable. It's treatable.
